RG Solution

200, chemin du Parc Industriel
St-Romain, QC
G0Y 1L0

Attention: Stephane Dufresne, Sales & Marketing - Vice President

Dear Mr. Dufresne,

Re: Reference Letter

RG Solutions has been a long time architectural and engineering client of Steenhof Building Services Group. We have supplied engineering and architectural services to many of their projects across Canada and the high Arctic. We have found RG Solutions to be a responsible and trustworthy business client who deals with integrity and respect.

Its buildings products are of high quality and are long lasting with an excellent durability performance. RG Solutions is able to assist their clients by taking their building and project needs and requirements and completing an effective design development process while respecting budgetary constraints. The process is a collective approach with straight lined communications. Agreed upon time lines and schedules are met with this communication approach. The deliverables are, relevant conceptual designs leading to production/building permit working drawings.

As the manufacturing process for the buildings occurs in a state of the art climate controlled facility. The resulting buildings manufactured are of the highest quality, as the environmental damages to materials used for manufacture are eliminated. Factory worker conditions are optimized resulting in better manufacture of the constructed building with reduced time lines. The plant quality control is managed by a quality assurance regime which is strictly adhered to, allowing the plant to produce a nationally certified building, audited by a third party certification agency. An additional benefit is that a project's construction risk is minimized as the construction on-site is reduced to civil works, foundation construction and assembly ("stitching") of the modules on-site. Capital budgets can be maintained.

Therefore all three tenants of great project management; a quality project, on time and budget are possible. In summary we do not have any hesitation in recommending RG Solutions for your project.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "J. Steenhof".

Jack Steenhof, M.A.Sc., P.Eng.
